greater security in session creation.

The agency's solutions could shift the current interest in using high-layer security protocols like secure sockets layer as virtual private networks. The security alert noted that since SSL and SSH1/SSH2 do not prevent a TCP connection re-start, it is better to use Layer 3 cryptographic solutions such as IPsec to create secure TCP sessions.

The department's Computer Emergency Readiness Team also issued a warning Tuesday (April 20) for Cisco's earlier use of hardwired support for Simple Network Management Protocol, though the implications of the SNMP vulnerability were less critical than the BGP/TCP problem. Cisco said it has already identified several solutions.

- [New Samtec Board-to-Board & I/O Interface Catalog](#)

Samtec F-204 Full Line Catalog has been expanded to include new high speed and high density interfaces, micro board-to-board and I/O interfaces, cable/wire/flex systems and micro-rugged power and circular connectors.

- [Free National Instruments Visual Basic Tutorial](#)

Free technical tutorial to help you develop a simple data acquisition application by leveraging tools in Measurement Studio for the Visual Basic environment.

- [FREE Windows-based software package](#)

Designed for the IFR3410 Series digital RF generator, IQ Creator is a FREE software package enabling users to create waveform files that emulate digital RF transmission formats. Download now.

- [Signal Integrity for High Frequency Board Design](#)

"Learn for GHz designs: relevant interconnect standards, BER prediction and analysis, signal integrity performance factors, via and power plane design, NRZ and 4PAM signaling differences, 8B10B encoding benefits, eye diagram analysis. Free webin...

- [Prototype Circuit Boards from PCBexpress](#)

Leading Internet supplier of prototype circuit boards. Successfully selling pcbs online since 1997. Easy order process for quick turn pcbs (24-hrs) 2-6 layers up to 20 pieces. No tooling charges for our quality prototype boards. Try us out today.
